

WHAT TO EXPECT DURING A RESTORATION

Restoring a classic vehicle is a detailed, time-intensive process. Understanding how the process works helps ensure a smooth experience for everyone involved.

Disassembly Reveals the Unknown

Hidden rust, previous repairs, or damage are often discovered once a vehicle is disassembled. This is normal and expected in restoration work.

Timelines Are Flexible

Restorations involve parts sourcing, specialty services, fabrication, and curing times. We pride ourselves in working very efficiently but do prioritize quality over speed.

Progress Happens in Phases

Some stages show rapid visible progress, while others (bodywork, fabrication, wiring) take time with less visible change.

Communication & Updates

Updates are provided as progress is made via regular text messages or emails. While we are always available, these can vary at times from weekly to daily depending upon the current stage of the project.

Costs Evolve as the Project Develops

As the true condition of the vehicle becomes clear, scope and costs may change. All changes are discussed before work continues.

The End Result

A properly restored vehicle takes patience and craftsmanship. Our goal is to deliver work you'll be proud of for years to come and strive to restore every vehicle to be better than our last.
